

PhotoElectric Smoke Detector SLV-E(J)

Hochiki's new Photoelectric Detector incorporates a redesigned smoke chamber with 'Flat Response Technology' enabling it to be equally sensitive to a wider range of combustible materials, thus removing the need for Ionisation Detectors in the majority of applications.

- New Chamber design to reduce unwanted alarms.
- Flat response smoke chamber.
- Small mesh size prevents Ingress of Insects.
- Fully compatible with existing conventional panels.
- Twin alarm LEDs on the head for 360° viewing
